## $\mathcal{T}$ ypes of $\mathcal{W}$ allpaper

**p1** Translation in any direction.

pg Glide reflection.

pgg Two perpendicular glide reflections and 180 degree rotation.

**pm** Axis translation and reflection in axis.

**cm** Glide reflection and reflection in a parallel axis.

**cmm** Two perpendicular reflections and 180 degree rotation.

pmg Reflection in one axis and 180 degree rotation.

pmm Two perpendicular reflections.

**p2** Translation and 180 degree rotation.

**p4** 90 degree rotation.

**p4m** 90 degree rotation and 4 reflections.

**p4g** 90 degree rotation and two perpendicular reflections.

**p3** 120 degree rotation.

**p3m1** 120 degree rotation and reflection.

**p31m** 120 degree rotation and different reflection.

**p6** 60 degree rotation.

**p6m** 60 degree rotation and reflection.

## Notes:

- The letter p or c means non-rhombus or rhombus.
- The number after p is the highest order of rotation.
- The m means (mirror) reflection, g means a glide reflection and 1 means nothing there.
